

FIRE GEAR AND EQUIPMENT DONATIONS

We collect old or expired fire gear and equipment and send it to countries where people are in need of resources to safely fight fires.

No one should have to fight fires in jeans and a t-shirt, but in many places around the world, fire fighters do not have the necessary gear to safely fight fires.

These firefighters in Guatemala are using the pumper truck and protective gear Midwest Mission sent to them. These donations are from a fire department in the United States.

Typical Items Requested:

- Pumper fire trucks and ambulances in good, working condition
- Personal protective gear - coats, pants, gloves, boots, and helmets
- Breathing apparatus
- Exhaust fans
- Tools - axes, jaws of life, etc.
- Fire hoses and nozzles

Know of a Fire Department with turnout gear or equipment that is expired or they no longer need?

We can work with you on pick-up or delivery at no cost to the fire department. Expired turnout gear or equipment will only be sent outside of the United States. A liability and release form is available.
