SLEEPING MAT PROJECT

WEAVING TOGETHER CHURCHES AND COMMUNITIES

The Sleeping Mat Project is a fantastic way to reuse plastic bags, keep them from littering our environment, and give people without a bed a healthier sleep.

Sleeping Mats are made out of "plarn," plastic yarn made from grocery bags, using a Loom. The Sleeping Mats are great for those who need a barrier between them and the ground, and are distributed locally and internationally. They have been sent for disaster relief, the homeless, and those without a bed or mattress.

Putting a Loom in a common gathering place allows people to experience the joy that comes from serving while building community and engaging with one another – all while making a big impact.

A LOOM FOR YOUR CHURCH

Build your own Loom using the building plans found online at midwestmission.org/loom

Or, for a \$100 donation that will go toward material costs, we will give you a ready-to-go Loom.

1. Visit midwestmission.org/loom to read more about the Loom Project and watch how-to videos.
2. At the bottom of the page, fill out the Loom Request form.
3. Someone will soon reach out to you to coordinate pick-up and instructions. Videos, instructions, and tips will be available.
4. Set up the Loom in a common area, and watch as people come together and fellowship while doing mission work.
5. Hand out the completed mats to local organizations, or bring the mats to Midwest Mission or a Permanent Collection Site near you.
